and more exotic items like beryllium copper and oxygen free copper.

#### BRONZE

Full range of SAE 660 cored and solid in 24/48 hours.

Wide range of BS1400 PBI cored and solid in 3/4 days.

PB102 rod and plate in 3/4 days.

LB4 cored and solid in 3/4 days – limited range available

DGS1043/CA104 aluminium bronze rods in 3/4 days

and specials such as AB2 and "Oilite" bronzes.

Please ring with your enquiries for any yellow metals – we will always make an effort to help.

### High Performance Metals

Like the yellow metals this is not a range of products stocked at Wimborne but we do have excellent sources both in the UK and Mainland Europe for these products – with access to the USA for the really difficult items.

The range of products include Nickel Alloys (Inconel, Monel, Hastelloy etc), Super Duplex Stainless Steels, Titanium, Tantalum plus many other exotic materials.

Please ring with your enquiry – we will do our best to make an offer.
